

IDEA & DESIGN

This very graphic set of furniture is designed by Frédéric Collette for children 3-10 years old.

The furniture design is built up around the inclined sides of the letter A. These angles give stability so the children cannot easily tilt the furniture. They also enables A-Chair to be stacked in an elegant way. There is also room for a drawer below the seat where children can put toys and things. The stacked chairs form a practical chest of drawers. The drawers are equipped with magnets so they do not open while A-Chair is being moved.

A-Table has the same angles as A-Chair, so that the furniture fits perfectly together. A-Table is designed for 2 children sitting opposite each other and has 6 drawers, 3 on each side, for paper, pencils and stuff.

A-Table and A-chair were nominated for the Formland design price in 2006.

SIZE & DIMENSIONS

A-Chair: 30cm x 30cm, 58cm height (seat height 35cm)

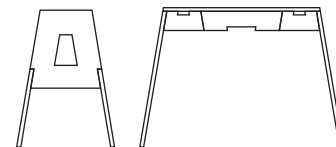

A-Table: 85cm x 85cm, 60cm height (top surface: 67x65cm)

MATERIAL & COLOUR

Plywood painted and lacquered in black red and orange.

TEST & QUALITY

The furniture is designed for private use and has been tested for strength, durability and stability according to current European standards. The plywood and paint have been tested according to the chemical requirements for children's toys EN71-3.
